

Compound Weave Belt

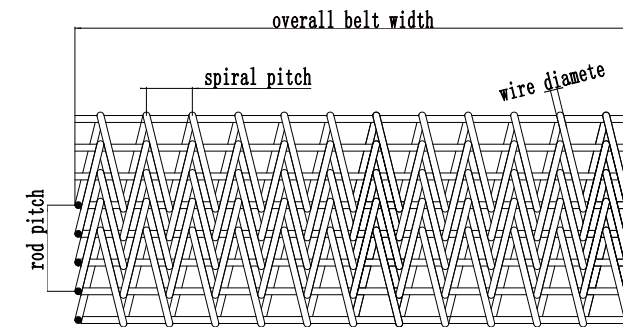

Compound weave belt is a variation of balanced weave belt. Right hand and left hand weave forms a very dense and smooth belt with most rod straight and some crimped. The belts are perfect to convey small products because of high dense mesh, such as nuts, bolts, screws, nails, cookies, chemical grain etc.

PRODUCT PARAMETERS

Material	Carbon steel, SUS201, SUS304, SUS316, SUS314
Wire diameter (mm)	1.2, 1.4, 1.5, 1.6, 1.8, 2, 2.5, 3
Spiral pitch(mm)	6-20
Rod pitch(mm)	6-20
Belt width(mm)	200-3000
Model	CB2, CB3, CB4, CBS

Special specifications are available

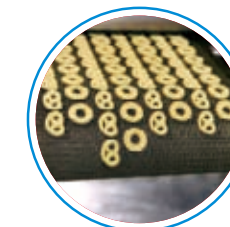

FEATURE

- Smooth surface, dense weave
- Excellent for conveying very fine or small products, as well as unstable or top-heavy items
- Allowable tension is high, heavy loading can be transported.
- Compound balanced belt against pressure is high, it can be used for processing under pressure.

APPLICATION

Powder Sintering Indust

Baking

Baking

Cooking

Heat Treatment
