

# Ultra-thin Flatten Mesh Belt

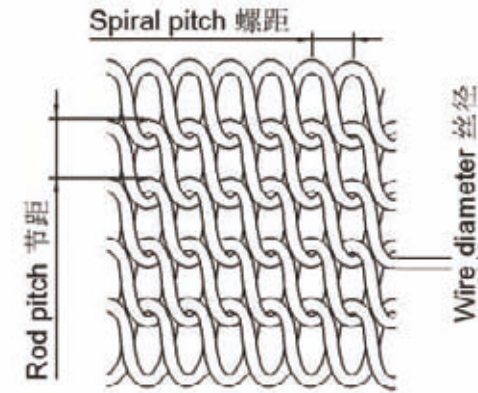

The ultra-thin flatten mesh belt, also known as a rolled baking belt, is a specialized product designed for the baking industry. Its lightweight and reduced size make it easy to handle, while its low heat inertia and good air circulation ensure high-quality baking results. The edges of the belt are looped or welded for greater flexibility and better contact with drums, even those with small diameters.

## PRODUCT PARAMETERS

Type	EBZ-47	EBZ-47-R	EBZ-48	EBZ-48-S	EBZ-28	EBZ-28
Tooling: pitch (mm)	8.2	8.5	8.2	8.2	6.3	6.3
Wire Diameter (mm)	1.2	1.5	1.3	1.4	1.0	1.0
Belt Pitch (mm)	4	4.5	4.3	4.4	3.2	3.2
Belt Pitch (mm)	5.4	5.2	6.8	6.7	3.9	3.9
Belt Thickness (mm)	2.4	3	2.6	2.8	2	2
Weight (kg/m <sup>2</sup> )	7.0	12.2	7.4	8.2	6.5	6.5

## FEATURE

- Good air circulation, Light weight, reduced size and thickness, low heat inertia
- High quality ,high strength
- Edges are looped or welded for greater flexibility and better contact with drums-even of small diameters
- Edge finish prevents the belt form being damaged by side guides and blades

## APPLICATION

Baking

Baking

Baking

Food Processing

Snack and bakery
